RWTH Aachen University

Catalin-Vasile Caliniuc

completed the RWTH Mastership Certificate Course “Laser Therapy in Dentistry” from 12 April 2021 to 12 December 2021 and successfully passed the certificate exam.

Herewith he is awarded the

RWTH Certificate “Laser Therapy in Dentistry”

Within the scope of the Mastership Certificate Course, the theoretical and biophysical backgrounds as well as all appropriate clinical indications and clinical pertinences of the most important wavelengths were taught. Moreover, basic knowledge of laser physics and safety, laser construction and handling, and laser diagnostics were thoroughly explored. The practical part included hands-on training, skill training and surgical demonstrations. Clinical cases were individually compiled and presented.

The focus was on the following wavelengths:

- Diode Lasers (650/ 810/ 940/ 980nm)
- Erbium Lasers (2.790/ 2.940nm)

The course was organised by the RWTH International Academy, the academy for continuing education of the RWTH Aachen University and the Aachen Dental Laser Center (AALZ).

This Certificate Supplement refers to the RWTH Aachen University Certificate with the Certificate-Registration-No. AI004-27695-10202.

Aachen, 12 December 2021
